Build Practical BPM Capabilities in One Day

Improving business process management practices doesn't always require an extensive training program or consulting engagement. BPM Accelerated Learning offers three focused, one-day sessions to develop essential BPM skills, strengthen process management practices, and identify opportunities for improvement. Each session is delivered live online and scheduled around your team's availability.

01

One Day BPMN

Learn BPMN 2.0 through guided examples and hands-on exercises. Develop practical process modeling skills using a standardized approach to documenting and communicating business processes.

Ideal for: modelers, analysts, project managers, and CoE teams. No prior modeling experience required.

Participants: Up to 10

02

One-Day Process Repository

Learn how to structure and manage a process repository, including content, standards, governance, roles, and ownership.

Ideal for: process governance owners, CoE teams, and repository administrators

Participants: Up to 10

03

One Day Repository Review

Work with Scheer Americas consultants to assess your repository's structure, content, and current practices, identify opportunities for improvement, and discuss practical next steps.

Ideal for: organizations with an established process repository looking to improve its effectiveness.

Not sure where to start?

Talk with our team about the right engagement for your BPM priorities.

About Scheer Americas

Scheer Americas is a consulting company that helps organizations achieve rapid, measurable business outcomes while building the business process management (BPM) capabilities needed for long-term success. We bring deep expertise in BPM to deliver results through short, high-impact improvement projects while enabling organizations to build lasting process management discipline.

This includes aligning business strategy with targeted initiatives, establishing process and data governance, and implementing supporting infrastructure such as process modeling, repositories, process mining, and enterprise architecture. Our solutions are provided through expert consulting services and tailored education programs for executives and practitioners. Scheer IDS Americas is part of the global Scheer Group, which has been delivering business process solutions for over 40 years.
